HIGHLIGHTS

- **Design systems at 4 organisations:** built from scratch at Rumah Siap Kerja and for 8+ Startrick client projects; extended mature systems at Waresix and Katim
- **CS background with code fluency:** read, review, and modify React, JavaScript, HTML, and CSS
- **AI across the full design process:** research, planning, review, and usability testing, using Claude, Claude Code, and Copilot

EXPERIENCE

UI/UX Designer · DOT Indonesia (B2B Tech Agency), Indonesia (remote)

Aug 2025 – Present

Embedded with Katim (UAE), designing a secure enterprise collaboration platform serving clients across 30+ countries.

- Work directly with the Katim product supervisor on design intent, usability, and roadmap decisions across 14+ shipped features
- Introduced a design token system to resolve cross-platform consistency issues, shortening QA cycles and streamlining developer handoff
- Defended design direction across stakeholder reviews, aligning product, engineering, and client-business expectations

UI/UX Designer · Startrick (B2B Tech Agency), Indonesia (remote)

Sep 2024 – Mar 2025

Sole designer on a cross-border team serving Malaysian SMEs and enterprises.

- Owned design end-to-end across 8+ projects, shipping high-fidelity prototypes that secured stakeholder approval and progressed to engineering
- Conducted UX audits and competitive benchmarks, translating findings into design decisions that addressed identified usability and IA issues

Product Designer · Waresix (B2B Logistics SaaS), Indonesia

Dec 2021 – Mar 2024

Logistics platform for 1,500+ clients including Unilever, Indofood, Sinarmas, and Mr DIY.

- Owned the redesign of Waresix's transportation management system (TMS) end-to-end with PMs and engineers; ops now runs on the platform at 95.5% delivery fulfillment and 93.1% on-time delivery across hundreds of daily routes
- Led user research on transport partner workflows (interviews, usability testing, A/B testing), shipping changes that increased adoption by 66%
- Facilitated design-thinking workshops with PM, engineering, and ops stakeholders, cutting quotation workflow time by 57.2%
- Extended the design system with new components and 4+ authored guidelines, accelerating engineering handoff
- Ran design reviews with designers from adjacent teams and exchanged work cross-team for peer feedback, strengthening quality across dependent products
- Mentored junior designers and managed design interns through weekly critiques

UI/UX Designer · Rumah Siap Kerja (B2C EdTech), Indonesia

Nov 2020 – Nov 2021

Consumer learning platform (Kartu Prakerja, government-partnered), serving 574K+ users across Indonesia.

- Led mobile-first redesign through iterative testing, contributing to growth in voucher redemptions from ~5K to ~459K and class completion certificates from ~4K to ~712K
- Restructured information architecture around a validated user persona (qualitative & quantitative research), reducing task completion time

TOOLS

Design & prototyping: Figma, FigJam, Miro, Maze, Stark, Protopie, After Effects

Development & AI: React, JavaScript, HTML, CSS, Git, GitHub, Claude, Copilot

Collaboration: Jira, Confluence, Notion, Slack

EDUCATION

Bachelor of Computer Science, Information Systems, Universitas Indonesia · Google UX Design Professional Certificate, Google
